

COOPERATIVE OF FOOD PRODUCTS

Some students opened a Cooperative of food products. As we were working together with the Erasmus Plus project Open Science Schooling, we chose most of the products coming from the forest or with some origin in the forests: honey, berry jams, aromatic bags and book markers with flowers, mushroom cookies, among others.

We sold these products in a local market and also to another school from Asturias.

Some products: We made the bags and markers ourselves

Honey from our area, Berguedà:

Jam also made in a local ecological family industry (L'Aranyonet):

Mushroom cookies with made with local mushrooms in a local family run industry (Casabella Natura)
